Business Strategy

Creating a Differentiated Community Bank

Organic Growth

- Build the premier community bank franchise serving customers and small to mid-size businesses in the New York City metro area and Long Island
- Continue to penetrate the potential customer bases across multiple, highly profitable niche verticals that have substantial expansion potential
- Continue to serve the local economies in our geographic footprint with a sustained commitment to unparalleled service that is beyond the scope of larger banks and economies of scale that are beyond the reach of smaller competitors

Strategic Acquisitions

- The CFSB acquisition in August 2019 provided us with full-service branches which complemented our lending in those areas
- Expanded commercial banking capabilities through the Savoy acquisition, with a particular focus on small business clients and Small Business Administration (SBA) lending
- Continue to pursue prudent and commercially attractive acquisitions in both traditional banking and select non-bank targets

Diversifying Loan Portfolio through Niche Segments

- Focus on diversifying the loan portfolio through niche lending segments to generate appropriate risk-adjusted returns
- Continued growth and diversification through niche-residential real estate, conventional C&I and SBA and USDA lending
- Commitment to complementing portfolio growth with continued growth of secondary market sales for SBA and USDA and non-QM residential loans
- The Company's loan pipeline at September 30, 2025, is approximately \$179 million, with 72% in niche-residential and SBA/USDA lending opportunities and 24% in conventional C&I and CRE – Owner Occupied lending opportunities

Complementing the Lending Efforts and Diversifying Funding

- The deposit and treasury management products and services complement the niche lending focus
- Established a municipal banking business in 2020 with potential to produce a significant level of deposits at cost effective rates with the effort led by Michael Locorriere
- Continued development of strategically located, highly efficient branches in key commercial markets to drive organic, relationship-based deposit and loan growth

Investment Highlights

High Degree of Franchise Scarcity Value

- Recent market consolidation has resulted in a lack of sub-\$5 billion asset sized banks in the Long Island and Greater New York City Metro Area.
- Since June 2020, there have been 24 bank transactions in the tri-state area, 17 of which involved targets with total assets less than \$5 billion.

Niche Lending & Funding Expertise Drives Pricing Power

- Since 2014, the residential mortgage operation has been highly focused on non-conforming lending in New York City. With the addition of Savoy, the Company acquired a niche in SBA and small business commercial banking platform.
- Hanover's municipal deposit banking business is differentiated in that it is focused on long-term relationships that typically have less pricing volatility, particularly in rising rate environments.

Efficient, Profitable and Scalable Business Model

- Significantly enhanced the Bank's commercial lending activity with the opening of the Hauppauge Business Banking Center in May 2023 and the hiring of our EVP & Chief Lending Officer, Joseph Burns (previously First Senior VP and New York State Market President of Valley Bank).
- Demonstrated track record of profitability and investing in the business. Hanover is highly focused around profitability and a highly efficient operating platform and branch network.
- The Company's level of assets, loans, deposits and revenue relative to the number of branch offices is well above peers. Management believes a continued focus on operating efficiently will result in above average levels of profitability over the long-term.

Disciplined Underwriting and High Quality Balance Sheet

- Since 2016, Hanover has incurred \$8.1 million in cumulative net charge-offs, representing 75 basis points of average loans over that time period.
- Total non-accrual loans at September 30, 2025 were \$17.2 million, or 0.86% of total loans.
- Hanover's reserves of \$22.4 million represent 1.12% of total loans at September 30, 2025.

Demonstrated Ability to Integrate M&A Transactions

- Hanover's executive team, which is led by Chairman and CEO Michael Puorro, has significant experience with M&A transactions and post-closing integration efforts.
- In August 2019, the Company closed the CFSB acquisition and has successfully grown the former CFSB deposit franchise.
- In May 2021, the Company closed the Savoy merger, acquiring an approximately \$650 million total asset single branch commercial bank located in NYC. The transaction significantly diversified the revenue and lending mix while boosting profitability and leveraging Savoy's expertise in commercial and SBA lending.

- The table above reflects a proforma stressed evaluation of the Bank's Multifamily stabilized loan portfolio at September 30, 2025, using the primary assumption for a revised Debt Service Coverage Ratio ("DSCR") calculation, for all loans where the current interest rate is below 6%. The current balance for these loans is recast at 6% (despite lower current market rates) with a 30-year amortization.
 - The projected Loan-to-value ("LTV") assumption resets all loans using a 6% cap rate (despite lower current cap rates) and the last reported property net operating income ("NOI") to determine an implied property valuation based on the current loan balance and resultant LTV.
- The results show approximately 3%, or 9 loans totaling \$14 million of the total multi-family portfolio would have proforma DSCR's less than 1x while maintaining projected weighted average LTV's under 100%.
- Approximately 93% or 89 loans of the Multifamily rent-stabilized portfolio totaling \$180 million would possess DSCR's greater than 1x while maintaining a projected weighted average LTV well within our policy guidelines.
- Additionally, 73% of the stabilized portfolio and 72% of the entire multifamily portfolio are further secured with personal guarantees from borrowers
- Of the previous 12 months' maturities and rate resets, 27% of the loan pool successfully refinanced with other institutions at market rates similar to those used in the analysis above and the balance remained with the Bank. We believe the overall demand for multifamily housing in our market will allow our borrowers to address any adverse impact proactively.
